

MEMORANDUM

TO: Telecommunications Coordinators
Data Processing Managers (#00-10)

FROM: Frank Cavallaro, Manager *FC.*
Bureau of Communication and Computer Services

DATE: September 14, 2000

SUBJECT: Voice Over Packet Presentation

Central Management Services is pleased to offer you a half-day presentation of voice over packet technologies, including Voice Over Internet Protocol (VOIP), on **Tuesday, October 3, 2000**. We have engaged Steve Taylor, President of Distributed Networking Associates and Publisher/Editor in Chief of Webtorials.Com, to present the topic in conference rooms C and D of the Public Affairs Center (PAC) of the University of Illinois – Springfield from 9 a.m. to 12 p.m.

The discussion will include the following elements:

- Voice over packet (IP/Frame Relay/ATM) overview
- Technology developments
- Industry trends
- Economic and Business Considerations

We have identified voice over packet technology as one of those “hot technologies” that we read about in the trade magazines and are hoping that through advance education, we can position ourselves to make informed decisions when it becomes available.

Please forward this invitation to other interested parties in your agency. If you plan to attend, please R.S.V.P. to Sarah Zerfas by September 26, 2000 at sarah_zerfas@cms.state.il.us or by telephone at (217) 524-2159.

Directions to the campus are attached.
